Stylish, High Quality Baby Gear!

Stylish, high quality baby gear! I never would of thought the most comfortable front style baby carrier I have would have been designed by men. Belle (Bell- ay) Baby Carriers were designed by Seth Murray and Mark LeBeau, dads and rock climbing safety equipment designers. I couldn't believe how absolutely comfortable this baby carrier was. Super soft fabric on the inside against baby's skin and very comfortable for mom as well. It is so easy to put on, just one piece, I think it took me all of one minute to figure it out. I love the fact that when I put my baby in the carrier she was directly against my body, not more fabric, and when your baby is facing you, you can actually breastfeed them in the Belle Baby Carrier. I don't think I have ever seen one quite like this, I love it! The carrier itself is lightweight and cool which is great for the upcoming hot weather. Who wants a super bulky carrier strapped to them in 110 degree weather?

The Belle Baby Carrier comes in so many really cool print choices to fit your personal style. My favorite is the cheetah, but they all are awesome. For the eco-conscious they also have three organic color choices as well. You can use your stylish carrier until your baby is 25 pounds, so it's well worth the money. My daughter is 16 months old and still doesn't weigh 25 pounds. She loves to be carried so a nice carrier still comes in handy even though she is walking well. I have had my share of baby carriers, I think this one tops them all for the best front style carrier out there. See for yourself. Celebrity mom Julia Roberts has been spotted toting her little one around in her Belle Baby Carrier. Super comfortable, super easy to use, and super stylish. A definite BabyGearToday must have!!! Get yours [HERE](#).

Featuring the Belle
in Cheetah print.
