## The Belle Baby Carrier... Perfect for your upscale baby!

If you are looking for an organic alternative to the Baby Bjorn, look no farther than the Belle Baby Carrier.

Already a favorite with eco-conscious celebrity parents like Julie Roberts, these packs are made from natural fibers, and organic hemp and cotton versions are available.

They are ergonomically designed to promote the health of both you and your baby. The unique design distributes the weight of your baby to your hips, taking pressure off your back and shoulders.

The carrier is adjustable so that your baby can face in or out. The inward-facing position is great for discrete nursing. It is safe for use with infants weighing between 10 and 25 pounds and is light enough for use in any season.

You can buy one from the company's Web site ([bellebabycarriers.com](http://bellebabycarriers.com)) for \$89.95-\$99.95.
